

DESCRIPTION

JUMBO STOP RUST 1000 is a premium rust preventive lubricant which prevent corrosion and rusting of metal surface from extreme condition for long periods of time. It has superior water displacement capability that makes an excellent choice for parts after direct contact with water.

APPLICATIONS

Generally used for all metal surfaces on machined or finished parts that may corrode, particularly after direct contact with water, steam, salt or alkaline cleaner on wide variety of industrial equipment.

BENEFITS

- Outstanding rust preventive film on metal surfaces
- Water displacement capability
- Easily removed using solvent base
- Excellent penetrating properties

TYPICAL PROPERTIES

Characteristics	Typical
Specific Density, 15°C	0.83
Kinematic Viscosity, at 40°C	2.04
Color, ASTM	L 3.5
Flash Point, °C	72
5% Salt Spray Test, Days	96
Humidity Cabinet Test, Days	60+

PACKAGING

200 Liter – Drum, 20 Liter - Pail
